Lab # 5
Multi Page App

Objective

To build an iPhone application that has multiple pages.

Key Concepts

- Navigation Controller
- View Controller
- Segues
- UI Image View

Requirements

Build an iPhone application as shown in **Figure 1**.
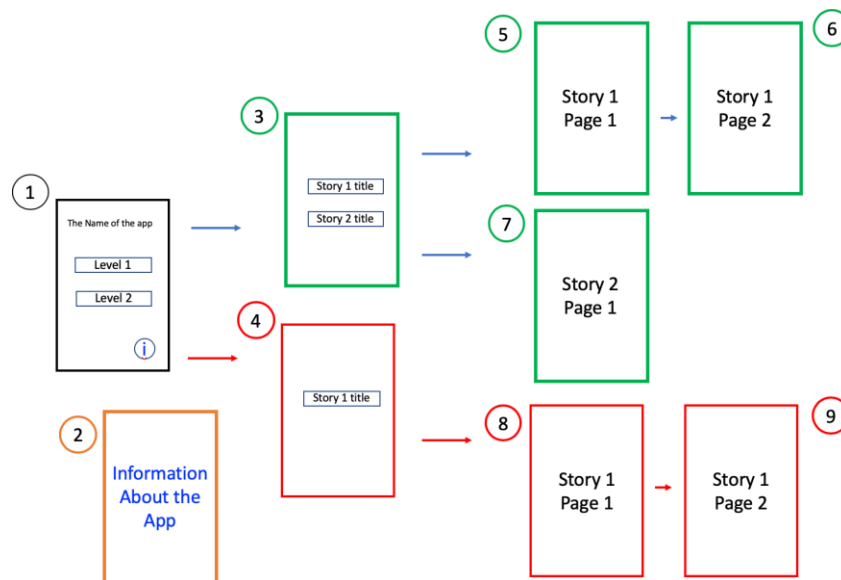

Figure 1 The overall layout of the application

1. The user gets two level of kids' stories that you can navigate through.
2. The app should have an info page that gives information about the app and explains the age of the kids for each level
3. Level one consists of two stories.
4. Story one of level one has two pages. Each one includes part of the story
5. Story two of level one has one page.
6. Level two has only one story.
7. Story one of level two has two pages. Each one includes part of the story.
8. Each page has to have an image background of your choice.
9. The app has to have an app icon of <u>your choice</u>, but do not use the app icon which was provide in the previous labs.
10. The app has to work only on the portrait mode of the phone.
